

DESIGN/BUILD SERVICES

The concept of a single-source vendor is becoming popular in today's marketplace. But in an effort to become this single source, many companies offer such a broad range of products and services that they no longer specialize in anything. At infinIT, we take a different approach to being a single-source vendor. Instead of spreading our service offerings over several industries and product lines, we specialize in just one industry—structured cabling—and offer complete services from planning and design to installation and support.

There is no step in any project more important than up-front planning. Our engineers have the education and training to know which questions to ask and the expertise to design a cabling system that will stand the test of time. But the process doesn't end at design. The full benefits and functionality of a cabling system won't be realized without quality installation as well. Our technicians are certified by BICSI and numerous manufacturers to perform installations that meet the latest and most stringent industry standards. When infinIT turns the finished system over to our customer, we deliver as-built CAD drawings and certified test results along with a 20-year warranty covering the installation.

With infinIT, a project is never really "done." Ongoing support and friendly service down the line is what makes us truly valuable to our customers.

If you're looking for a single-source vendor, who better to install a cabling system than the company that did the design? And who will be there to support your system in the future? You want infinIT.

Based in Waunakee, Wisconsin, infinIT llc is a leader in the structured cabling industry. We specialize in expert planning, installation and support of structured voice and data cabling, security systems, sound, paging and intercom systems and fiber optics. Our dedication to customer service is our guiding business principle.
