

FIBER OPTICS

In today's technology-driven world, one thing is certain. As hardware and applications evolve, the media that information travels across must change also. System requirements and transmission speeds are constantly in flux. The answer to the ever-increasing need for speed is fiber optics.

At infinIT, our job is to stay ahead of the technology curve and so our customers can be prepared to face the challenges of the future.

We spend a great deal of time and effort training our workforce. Knowing the latest fiber optic installation techniques ensures that our customers get the best product and the best installation available. Our technicians excel at installation of fiber backbone, outside plant installation, video over fiber and many other fiber optic applications. In addition, our engineers regularly attend seminars and training to keep updated as our industry changes. This proactive approach makes us a valuable asset in planning, designing and installing the fastest cabling systems available.

We are dedicated to bringing the latest fiber optic technology to our customers. Our customers can be assured that infinIT will provide solutions that will meet their needs now and for years to come.

Based in Waunakee, Wisconsin, infinIT llc is a leader in the structured cabling industry. We specialize in expert planning, installation and support of structured voice and data cabling, security systems, sound, paging and intercom systems and fiber optics. Our dedication to customer service is our guiding business principle.
